

## CH-4 Diesel Engine Oil

### **【Performance features 】**

- Remarkable anti-wear and anti-corrosion performance, which can eliminate the wear and corrosion of the diesel engines under easy-soot condition caused by two-stage bimetallic piston , high-pressure direct injection or retarded injection;
- Superb thermal stability and dispersing performance, which can restrain effectively the generation of piston deposits and keep engine clean;
- Superb oxidation stability which can effectively avoid excessive viscosity increase of oils under high soot condition;
- Excellent anti-foam performance and Extremely low volatility

### **【Application 】**

It is particularly appropriate for the large heavy-duty container trucks and the bulldozers, grabs, mining equipments and power generation assemblies operating under various rigorous working conditions.

### **【Products 】**

5W/30, 10W/30, 10W/40, 15W/40 and 20W/50.

### **【Recommended Drain interval 】**

25,000 km.
